WINTER'S TALE

Directed by Avika Goldsman
Starring Colin Farrell & Russell Crowe

Not to be confused with the Shakespeare play of the same name *Winter's Tale* tells the story of a burglar called Peter Lake (Colin Farrell) who falls in love with an heiress (Jessica Brown Findlay) only to lose her all too soon. Through a series of mysterious events and pursued by time through his enemies Peter ends up in modern day New York, unsure of anything other than his enduring love for his darling Beverly. Spanning more than a century this extraordinary love story is one of miracles, destiny and the ever-raging battle between good and evil. The film, directorial debut of Academy Award-winning screenwriter Avika

Goldsman (*A Beautiful Mind*), is based on the acclaimed novel of the same name by Mark Helprin and features a galaxy of stars including Jessica Brown Findlay of *Downton Abbey* fame and Australian heavyweight Russell Crowe as the villain of the piece. Incredibly promising newcomers include Ripley Sobo and Mckayla Twigg fresh from the Broadway run of acclaimed Irish musical *Once* but the film's heart is located unequivocally in Colin Farrell's devastatingly romantic lead performance that is guaranteed to have every woman in the audience besotted by the time the credits roll.

● This diverse and exciting exhibition brings together works from three brilliant female artists each with their own distinct style. Gemma Nelson's pieces show an intensive attention to detail that creates a tapestry style narrative whilst Martine Poppe's smoky paintings evoke a feeling of nostalgia.
